### IMPORTANT

**These are only exemplary illustrations, please always refer to the operating instructions for your device!**

All safety instructions describe in detail the potential risks they address and contain precise instructions on how to avoid injury, damage to property or electric shock as a result of improper handling. Please observe the following guidelines:

**WARNING**

1. Disconnect the appliance from the power supply before carrying out the procedures described.
  2. Use protective gloves before starting work.
  3. Only carry out the described procedures when the appliance is cold.
- Always disconnect the appliance from the power source before carrying out installation work.
  - Installation and repairs should be carried out by qualified specialists in accordance with the manufacturer's instructions and the applicable local safety regulations. Therefore, only carry out repairs or replace parts yourself if this is expressly provided for in the user manual.
  - Only use certified spare parts, in case of doubt original spare parts.
  - Read all instructions carefully to avoid improper use and the associated risk of injury.
  - Do not touch accessories and spare parts with wet hands.
  - Take care with hot surfaces: Do not touch any hot surfaces on the appliance.
  - If necessary, do not use this appliance near bathtubs, shower trays, sinks or other containers that contain water or other liquids.
  - Suitable work gloves should always be worn when installing or servicing accessories.
  - Risk of burns: Avoid contact during and immediately after use. Allow the appliance to cool down completely before starting repair work.
  - Children and persons with reduced physical, sensory or mental capabilities or lacking sufficient experience and knowledge should only use the appliance under supervision or after thorough instruction by responsible persons.

- Keep packaging material out of the reach of children: Children could wrap themselves in packaging materials such as plastic bags or foils or pull them over their heads, which could lead to suffocation. Therefore, make sure that packaging materials are kept out of the reach of children.
